

Math 120 WB21 Syllabus

Lecturer

Hyunah Lim

E-mail : hyuna913@umd.edu

Office Hours : By appointment

Communication : You are always welcome to reach out by messaging me through Canvas - this is often the quickest way to reach me. When using email, please include "MATH 120" in the subject line so that I can identify you as my student.

Course Policies

Note that in this course, all your work has to be clearly explained to receive credits. What we value in this course and in any math courses are your logic and understandings, not the answers. No points will be given for answers with incorrect works, irrelevant works, or works containing materials not covered in this course.

External sources (Anything not out of your brain, and yes, calculators are certainly one of them.) are not allowed during the exams.

Calculators

Calculators (including online) are not allowed in exams and quizzes. All problems you face in your exams, quizzes, and assignments will be written carefully so that calculations are manageable by hand. Use of calculators on assignments are not prohibited. However, note that they will be valuable chances for you to practice all the calculations you will need in your exams.

Homework

Lowest two assignments will be dropped to account for any unforeseen circumstances. Late submission will **not be admitted after a week from the due date** of each assignment, and all assignments have to be submitted **before August 21st**. Otherwise, late assignment scores will receive a factor of 0.8.

Grading

There will be 8 homework assignments, and 3 exams. After dropping the lowest 2 homework assignments, your total grade will consist of **Assignments (40%)**, **Exam 1 (20%)**, **Exam 2 (20%)**, and **Final Exam (20%)**. All of these will be accessible on Gradescope, including feedback.

Grades will not be rounded and will be assigned using the cut-offs:

$97 \leq A^+$	$87 \leq B^+ \leq 90$	$77 \leq C^+ \leq 80$	$60 \leq D \leq 70$
$93 \leq A \leq 97$	$83 \leq B \leq 87$	$73 \leq C \leq 77$	$0 \leq F \leq 60$
$90 \leq A^- \leq 93$	$80 \leq B^- \leq 83$	$70 \leq C^- \leq 73$	

Exams

Exam 1 : July 23rd Midterm 2 : August 6th Final : August 22nd

All exams will take place during the regular class time. Makeup exams will not be given unless a student can present evidence of serious illness, a death in the immediate family, and religious observance. **Notice** must be given **in advance** to be allowed to take makeup exams. Failure to do so will result in scoring zero for the exam.

Tentative Schedule

The following schedule is subject to change.

Date	Topics	Textbook Section
July 14th	Lines, Slopes of Curves	1, 2.1
July 15th	Derivatives, The Power Rule, Polynomials	2.2 - 2.4
July 16th	The General Power Rule, Some Applications of Derivatives	2.5 - 2.6
July 17th	Velocity, Acceleration, and Second Derivatives	3.1
July 18th	Derivatives and Graphs	3.2
July 21st	The Second Derivative Test for Max & Min	3.3
July 22nd	More Derivatives and Graphing	3.4
July 23rd	Exam 1	1 - 3.4
July 24th	Optimization	4.1
July 25th	Demand Functions, The Product Rule	4.2, 5
July 28th	Exponential Functions	6.1, 6.2
July 29th	Logarithms	7.1, 7.2
July 30th	Population Growth, Compound Interest	8.1, 8.2
August 1st	Exponential Decay, Differential Equations	8.3, 8.4
August 4th	Differential Equations (Continued), The Logistic Growth Formula	8.4, 8.5
August 5th	Antiderivatives, Exam 2 Prep	9.1, Review
August 6th	Exam 2	4.1 - 8.5
August 7th	Antiderivatives	9.1
August 8th	Definite Integrals	9.2
August 11th	Areas	9.3
August 12th	Areas (Continued)	9.3
August 13th	Consumers' Surplus	9.4
August 14th	Introduction to Probabilities, Uniform Distribution	10.1, 10.2
August 15th	Exponential Distribution, Normal Distribution	10.3, 10.4
August 18th	Normal Distribution (Continued), General Probability Density Functions	10.5
August 19th	Partial Derivatives	11.1
August 20th	Higher Partial Derivatives	11.2
August 21st	Max-Min with Two Variables	11.3
August 22nd	Final exam	All of the above
