What did this TA do well, and what could they work on?

Comments
I liked this TA a lot, she was helpful with homework questions, questions about the class content, and pointing out mistakes when reviewing assessments. She made the material easy to understand and did relevant problems that supported my understanding of the class content.
I loved the TA had, she made everything much clearer than the professor and help with an questions that I had. She made being the discussion interesting and eventful. I learned much more from her than the actual professor.
Hyunah was a big help in supplementing and developing my learning throughout the course. She was able to answer questions and word them in a way I understood, once I expressed where I was coming from in terms of understanding parts of the material. She went through lecture questions in a thought-out and easy to understand way. She largely helped me grasp difficult concepts throughout this course.
She did a great job of breaking down problems step by step so students could fully understand the concepts and practices being displayed in the problems.
The TA was really good at taking what we learned in class and summarizing it to make us understand it better. She was also good at doing different types of examples so that we hit all kinds of things. She was good at answering questions and providing feedback and help when asked.
She was amazing in every way and the only reason i did well in this class
TA did an amazing job connecting what was taught in the lecture and showing how to use those techniques for homework, quizzes, and exams. Was also able to answer questions that were brought up and quickly provided an answer which can clarify said question.
She was good at explaining the subject and was more clear in teaching it than the actual professor
Good at giving a more detailed explanation of the material covered the day before. No improvements needed.
She provided relevant questions to the actual exams so we could perform well on the exams.
Everything. She was kind and patient and was very helpful with homework, quizzes and exams.
Hyunah was great at preparing us for each of the quizzes we took and before every exam she would list all of the material that we learned over the unit in a brief and understandable list that helped guide our studying. I see little room for improvement in Hyunah's work, she was a fantastic TA
Hyunah Lim was a fantastic TA and probably the sole reason I survived in this class, she explained concepts in a clear and understandable way for those of us who weren't very familiar with the material. She also prepared us well for the quizzes and gave good feedback on those quizzes. I think she was a good and dedicated TA, I don't have anything negative to say about her.
The TA was great and really did all she could to help us succeed in the course
The TA did a really good job of doing concise reviews of the material. It helped seeing problems done in a different way than the professor because it expanded my ability to solve problems. I have nothing the TA could work on– I enjoyed their discussion!
I personally thought she did a great job of reviewing the topics we covered in class.
The TA was very helpful on giving feedback however they could work on describing subject matter in an efficient way.
Great job breaking down topics
